PROFESSIONAL SUMMARY

Strategic Solution Architect and Presales Consultant with a proven track record of engineering digital transformation, SaaS applications, and enterprise AI services. Owns the end-to-end technical solution lifecycle—from initial client discovery and site surveys to R&D, POC creation, and seamless platform release. Possesses massive cross-industry penetration, having designed and integrated cutting-edge customer journey architectures for the Education (EdTech), Banking, Healthcare, and Smart Real Estate sectors. An expert communicator and technical advisor adept at bridging the gap between business stakeholders and engineering teams, authoring comprehensive technical/financial proposals, and orchestrating complex RESTful API, CRM, and cloud integrations for large-scale corporate environments.

PROFESSIONAL EXPERIENCE

Alfa Electronics

Oct 2024 – Present

Solutions Architect & Presales Consultant

Cairo, Egypt

- **Presales & E2E Solution Lifecycle:** Act as the primary digital transformation consultant, managing the complete product lifecycle from client meetings and site surveys to R&D and POC delivery. Lead the preparation and presentation of compelling technical and financial proposals, successfully translating complex engineering architectures into clear business value to secure stakeholder acceptance.
- **Education & EdTech Solutions:** Architected advanced facility navigation (Wayfinder) systems, student application/admission booking platforms, and ID-scanning access management solutions for prominent institutions including BUE, AOU, October University, and the American School in Egypt. Delivered full system integration via WhatsApp/SMS gateways and internal priority databases.
- **Banking & Financial Sector Enterprise Architecture:** Designed centralized queuing operations, customer satisfaction feedback loops, and online reservation applications for major banking entities (NBK, HSBC, ADCB, IDB, KFH, NBE, Banque Misr). Mapped physical infrastructure with online banking apps via secure RESTful APIs and CRM integrations.
- **Healthcare Digital Transformation:** Re-engineered patient journeys and workflow architectures (queuing, nurse calling systems, and reservations) across premium health facilities including Cleopatra Hospitals Group, As-Salam International, and Ministry of Health Medical Councils, ensuring seamless CRM and patient database synchronization.
- **Smart Real Estate & Hospitality Automation:** Developed highly scalable visitor management, digital self-check-in, and smart parking (QR invitations/custom fee structures) systems for industry leaders like Madinet Masr, Taj City, Westin, and Steigenberger. Executed direct cloud integrations with existing hotel loyalty programs and guest databases.
- **National Rollout Strategy:** Conceptualized the engineering framework and systems sizing for a nationwide 60-branch infrastructure rollout for the Ministry of Electricity & Energy, ensuring flawless hardware-software interoperability.

PETROJET

Sep 2023 – Sep 2024

ICT Infrastructure & Design Engineer

Cairo, Egypt

- **Architecture & Engineering Frameworks:** Formulated 25+ comprehensive Low-Level Designs (LLDs) and platform architectures, recommending optimum structural implementations that accelerated project delivery timelines by 30% while eliminating 15 design review iterations.
- **Complexity Mitigation:** Executed client site visits, field diagnostics, and technical documentation auditing for tracking networks across industrial development zones (SCZONE), mitigating architectural gaps and cutting operational downtime by 60%.

KEY AI & SOFTWARE PROJECTS (POCS)

AIoT Enterprise Workflow Automation & Smart Gated Control

- Engineered an automated hardware-software verification model connecting localized computer vision edge endpoints with centralized relational database structures via secure JSON webhooks, validating advanced access controls.

Data-Driven Analytical Console & Automated ETL Pipeline

- Built an interactive SaaS console utilizing Next.js, React, and Supabase to visualize real-time performance indices, backed by a custom Python predictive data engine that automated competitor market benchmarking, interpreted complex telemetry metrics, and cut effort estimation times by 40%.

TECHNICAL SKILLS & COMPETENCIES

- **Solutioning & Presales:** Digital Transformation Consulting, E2E Solution Design, Technical/Financial Proposals (RFPs/RFQs), Product Demonstrations, POC Development, Client Presentations, Stakeholder Alignment.
- **Enterprise Integration & Cloud:** API Development (RESTful, Webhooks), Cloud System Integration, CRM Systems, SMS/WhatsApp Gateways, Database Architecture.
- **Sectors & Technologies:** EdTech/Universities (Student Journeys, Wayfinding), Banking Solutions, Hospital/Patient Journeys, Smart Access & AIoT, Python Predictive Analytics, SQL, Next.js.

EDUCATION & CREDENTIALS

- **B.Sc. in Electronics and Communications Engineering** | Graduated 2023
- **Advanced Diploma in Embedded Systems for IoT & AI Engineering** | IMT (2022)
- **Industry-Aligned Training:** Embedded System Design Track at ITI (2021) & Suez Canal Authority Technical Certificate

ADDITIONAL INFORMATION

- **Military Status:** Exempted / Completed (Official Documentation Certified)
- **Languages:** Arabic (Native), English (Professional Fluent / Client Presentation Ready)
- **Work Culture:** Highly collaborative technical advisor, bridging business strategy with software engineering
